

BLUEPEAK TO BREAK GROUND ON NEW FIBER NETWORK IN CHEYENNE

High-Quality, High-Speed Broadband Service to be Available to Customers Later this Year

(Cheyenne, Wyo.) July 7, 2021 – [Bluepeak](#), the revolutionary internet provider, announced today that it will break ground later this month on the fiber network expansion that will bring high-quality, high-speed broadband and video services to residents and businesses in Cheyenne. With construction soon commencing, Bluepeak will begin delivering service to customers later this year.

“We are thrilled to bring a future-proof fiber-optic network to Cheyenne that will better connect the community,” said Rich Fish, CEO of Bluepeak. “Bluepeak is a different kind of provider that believes the size of the city shouldn’t determine the quality of the technology. We are committed to full transparency when it comes to the construction process and will communicate with Cheyenne residents every step of the way.”

Bluepeak was designed to provide the best fiber connection for communities without the things that get in the way of great service — like red tape, hidden fees and slow response times. Residential customers will have access to internet with symmetrical speeds up to 5-gigabit, and businesses can achieve speeds up to 10-gigabit and beyond. The Bluepeak network will be available to more than 25,000 homes and businesses across Cheyenne.

“Reliable, fast connectivity is integral to every aspect of our community – residents, businesses, schools and government,” said Cheyenne Mayor Patrick Collins. “We are thrilled that Bluepeak’s expansion will be underway later this month and look forward to their network rolling out across Cheyenne.”

As construction starts, Bluepeak is rolling out robust, proactive communications tactics to inform residents of the construction process. Residents will receive information in advance of construction commencement in their neighborhood, including a postcard, construction awareness letter, door hangers and yard signs.

About Bluepeak

Bluepeak is building a faster, more reliable internet without the things that get in the way of great service—like red tape, hidden fees, and slow response times. Offering up to 5 gigabits of speed for residential customers and 10 gigabits for businesses, Bluepeak is a whole new ballgame — from internet to TV, to connecting every device in a home, to powering a business, Bluepeak not only provides the best fiber connections in the communities it serves, but also meets the growing needs for how its customers live.

Bluepeak (Clarity Telecom LLC) is known as Vast Broadband today in South Dakota and portions of western Minnesota until those markets rebrand as Bluepeak in the summer of 2022. Visit <https://mybluepeak.com/> to learn more.
